**BOCAR**  
AUTO GEAR SINCE 1970

# WHO WE ARE.

Since 1970, Bocar has been producing affordable, premium quality heavy duty alloy ute trays, bull bars, accessories and more innovative auto gear that continually sets a new benchmark with each and every new design.

We were the first to design and release the contoured tubular headboard for ute trays, as well as the first to use shaped extrusion to ute drop side trays. And many of our designs and

industry firsts have created new standards in quality, which are widely copied but never matched.

We also design, engineer and test all of our Bocar products right here in Australia, because we want to ensure our customers that our products are more than equipped to suit tough Australian conditions.

Our goal is to supply high quality heavy duty products and great value for money to everyone in the automotive industry each and every day.

**SINCE  
1970**

## EXPERIENCE

Bocar is one of the oldest and most respected automotive brands in the industry.

## QUALITY

Bocar products are far superior and outmatch the competition in quality for products in the same price range.

## DURABILITY

Bocar products are designed, engineered and tested to suit harsh Australian conditions.

## INNOVATION

Many of our benchmark designs have created new standards in the auto accessories market.

## RANGE

Products are constantly being developed to extend the range in line with market expectations.

## SERVICE

Industry leading fitment and delivery times on the majority of stocked products.

# BUILT TOUGH.

## DELUXE & ULTIMATE SERIES UTE TRAYS

Accessible, tough and ready for whatever you throw at it, Bocar Ultimate & Deluxe Series ute trays continue to set the standard.

When you buy a ute tray from us, know that you're getting an automotive accessory that's been built by Australians for Australians. Designed and engineered right here in Australia, all of our ute trays go through extensive testing to make sure they're well equipped to tackle the challenges of the harsh Australian environment.

From its lightweight yet seriously strong, rust proof aluminium construction, to its ability to include welcome accessories such as a removable rear ladder rack or tool boxes, our ute trays are built with you in mind.

So, before you load up, ask yourself; is it a genuine Bocar accessory?

**BOCAR**  
AUTO GEAR SINCE 1970

# BUILT FOR BIG HAULS.

## Deluxe series ute tray

Deluxe series is the most common, and best recommended fit, for most ute vehicles on the market including Ford Ranger, Toyota HiLux and LandCruiser, Holden Colorado, Isuzu D-Max, Mazda BT-50, Mitsubishi Triton and Nissan Navara.

The genuine Bocar Deluxe alloy ute tray is a heavy duty and yet affordable tray suitable for general and heavy duty use. For Mercedes-Benz X-Class and VW Amarok the Ultimate series is recommended.

## Ultimate series ute tray

The Ultimate alloy ute tray is suitable for heavy duty applications and featuring an extra wide design (1980mm) along with higher drop sides (300mm) to help contain that extra cargo. Ultimate series is the best recommended fit for Mercedes-Benz X-Class and VW Amarok vehicles.

Also suits the following dual cabs; Ford Ranger, Toyota HiLux and LandCruiser, Holden Colorado, Isuzu D-Max, Mazda BT-50, Mitsubishi Triton and Nissan Navara however the extra width of the tray may obscure external OEM rear-view mirrors so, extendable mirrors may be required.

# TWO STYLES FOR ANY GAME YOU'RE IN.

Whether it's general or heavy duty use, the Deluxe series will become your new best friend. Thanks to its 1855mm or 1910mm wide body and 235mm high drop sides, it's perfect for work and play. For heavy duty applications, it can only be the Ultimate. It's extra wide, offers more height and comes equipped with tail light protectors because your haul demands the ultimate in quality.

# READY FOR ACCESSORIES.

## Removable rear ladder rack

Genuine Bocar  $\varnothing 76\text{mm}$  ladder racks have been designed not only to be strong and practical, but to also complement the shape and design of most light commercial vehicles.

The shape of this removable rear ladder rack matches the front headboard tube and is supplied with a satin finish.

Load holding pins are spaced 1200mm apart, perfect for carrying most material boards, which are commonly supplied in 1200x2400mm sheets.

## Part numbers

BCALRD .....Suits 6'1" wide (1855mm) Deluxe tray

BCALRDW .....Suits 6'3" wide (1910mm) Deluxe tray

BCALRU .....Suits Ultimate tray

### Under tray trundle drawers

Bocar trundle drawers are designed to utilise space under the tray deck which may be otherwise wasted.

With a three point stainless steel T locking system, these drawers are the ideal solution for secure and safe keeping of your valuable tools and other small items. These trundle drawers come with a complimentary anti-slip mat, that lines the entire drawer floor.

Bocar trundle drawers are available in two sizes. 6ft (1800mm) long for trays under 7ft, and 7ft (2100mm) for trays over 7ft long.

#### Part numbers

BCATD18 ..... 6ft long (L 1800 x W 750 x H 175mm)  
BCATD21 ..... 7ft long (L 2100 x W 750 x H 175mm)

### Under tray tool box

Genuine Bocar under tray tool boxes are made from quality 2.5mm thick alloy chequer plate, and are both water and dust resistant to help protect your cargo.

Only the highest quality materials are used, for example, all T Locks, hinges and chains are built with stainless steel.

Finished to high quality standards with smooth TIG welding, our tool boxes are seriously tough and built to last.

#### Part numbers

BCATBU75R..... Right side of wheel  
BCATBU75L ..... Left side of wheel

### Above tray tool box

Bocar tool boxes are made from quality thick alloy chequer plate and are both water and dust resistant.

Only quality materials are used, for example, all T Locks, hinges and chains are built with stainless steel, and heavy duty gas struts are used for door holding.

Finished to high quality standards with smooth TIG welding, our tool boxes are tough and built to last.

Toolbox dimensions: W 1500 x H 820 x D 530mm.

#### Part numbers

BCATBF1500 ..... Full door opening tool box, 1 x shelf  
BCATBH1500 ..... Half door opening tool box, 1 x shelf  
BCATBS1500 ..... Extra adjustable height shelf

# UTE TRAY TONNEAU COVER.

Protect your cargo from the elements with a genuine Bocar ute tray tonneau cover.

These covers provide a lightweight cargo protection solution, and can be easily installed and removed via the bungee cord.

The Australian sun will be no problem for these tonneau covers, which are constructed using 100% UV protected and rip-resistant material.

We've got your tray covered with sizes to suit all Bocar trays, with or without ladder racks.

Tonneau covers are covered by a market leading 5-year warranty so you can buy with confidence.

### Water tank & soap dispenser

Genuine Bocar water tanks are moulded from thick PVC and include an integrated tap and soap dispenser.

These water tanks are suitable for mounting to the left side of your vehicles' wheel.

#### Part numbers

WAT100 ..... Left side of wheel

# UTE TRAY FAQs.

## CAN I SWAP MY DUAL CAB STYLE-SIDE TUB TO A TRAY?

Yes. Bocar resellers can also supply and fit the tail, number plate brackets and lights as the tub lights are not suitable for the ute tray. However, this service will incur an additional charge.

They can load the removed tub on to the new tray so that you can take it away, or alternatively, find a suitable buyer for it if in good condition, or scrap it.

## WHAT'S THE MAXIMUM LENGTH UTE TRAY I CAN USE?

You can calculate the maximum size of a tray using the following formula:  $A \times 0.6 + B - 100 = \text{Maximum legal length in mm}$ . Where A is the distance between the wheel axles in mm and B is the distance from the rear of the cab to the centre of the rear wheel in mm.

There are legal limits on the tray size you can put on a vehicle. As a guide, please see page 25 for commonly used vehicles.

Obviously, common sense should prevail, irrespective of the legal calculation, the tray overhang should not be excessive (typical overhang is 150 to 300mm only).

If you have or are including a tow bar, it is better having normal length trays (as opposed to very long trays even though they are legal) due to accessibility reasons.

## WHAT ARE THE ADVANTAGES OF ALLOY UTE TRAYS?

Bocar Alloy Trays are made from high strength aluminium alloy extrusions, making them lightweight but incredibly strong. They practically don't need any maintenance as they don't need painting and don't rust.

The drop down removable sides and flat deck, not only increases load area, makes them more suitable for almost any application.

## CAN ALLOY UTE TRAYS CARRY THE SAME LOAD AS STEEL?

The load carrying ability is normally dictated by the vehicle load rating. Most utes sold in Australia have a load capacity of about 1 ton. Bocar Deluxe and Ultimate alloy ute trays are manufactured with a floor rating of 2.5 ton, so there is no problem in terms of loading.

In fact, using an alloy tray, the load capacity is higher than when using a steel tray. A typical alloy tray weighs about 100KG and hence can carry a load of about 900KG on a vehicle with a 1 ton capacity. In contrast, you can only load about 700KG on the same vehicle fitted with a steel tray, as the steel tray weighs about 250 to 300KG.

## STOCKADE SERIES BULL BARS

### Built to last in tough Australian conditions

Stylish and functional, the Bocar Stockade Series Bull Bar is the perfect front protection system available today. Built with a seriously strong steel construction and 63mmØ rounded tubing, making strapping and winching almost effortless, the Stockade Series bull bar is ready for anything your 4x4 can throw at it.

They're safety compliant, air bag compatible and ready to keep the vehicle's critical components safe in the event of animal strikes or accidental damage.

These bull bars come standard with a 3-in-1 LED light (indicator, park, DRL) and specifically designed light housing ready to add optional LED fog lights if you desire. All Bocar bull bars are covered by a 2-year 40,000km warranty, giving you peace of mind to get it fitted and get on with the job.

**BOCAR**  
AUTO GEAR SINCE 1970

# READY TO PROTECT.

A bull bar is designed to protect your vehicle and its passengers, but they also allow you to mount other crucial 4x4 vehicle safety accessories.

Purchasing a bull bar will add a certain amount of style to your vehicle and protect you from an otherwise unavoidable amount of damage in most situations.

Bocar bull bars are rigorously tested to ensure they are ADR (Australian Design Rule) compliant before going into production.

They are also thoroughly tested to ensure compatibility with your vehicle's existing safety features including airbags, parking sensors, radar technology and DRLs (daytime running lights).

While all the mentioned style and safety gains alone are well worth the investment, the benefits don't stop there. Adding a bull bar gives you the ability to add other accessories with their own safety features.

Take a good quality set of driving lights for example, which will light up the road and reduce fatigue on those long night-time hauls. Or the included antenna tab so you can add a decent UHF radio to keep in touch. Not to mention the bull bar's in-built winch compatibility and high-lift jacking points to get you out of any sticky situation.

# LOADED WITH FEATURES.

A Bocar Stockade Series bull bar boasts an all-steel construction that's designed to thrive in extreme conditions.

Smart, sophisticated and tough, this innovative unit combines three essential elements into one non-invasive round profile.

Wintry mornings or alpine summits, these 5W LED fog lights are exactly what you need to cut through any and all types of fog.

### Included features

- Strong steel construction body
- Thick 63mm<sup>®</sup> tube construction
- Matt-black textured powder-coat finish
- In-built winch compatibility
- 3-in-1 LED lights (indicator, park, DRL)
- Optional fog light kit (sold separately)
- Antenna tab & high lift jacking points
- ADR compliant and Air Bag compatible
- Vehicle safety features compatibility
- 2-year 40,000km warranty

# & WE'VE GOT YOUR VEHICLE COVERED.

# JOB DONE.

For off-road use and the rough Australian environment, you can't be without the protection and safety offered by a Bocar nudge bar.

The second you purchase a nudge bar you're instantly offering your utility vehicle additional protection from potential dents and scratches, while simultaneously increasing the customisation offered thanks to its built-in accessory mounts.

Rigorously tested to combat any situation you throw at it; our nudge bars are ADR (Australian Design Rule) compliant and air bag compatible so you've got peace of mind as soon as you hit the road.

And style, it's got that in spades. The sophisticated matt-black aesthetic hides a seriously tough yet lightweight  $\varnothing 76\text{mm}$  alloy tube body, while a vehicle specific mounting system positions itself perfectly to ensure badge, lights and more continue to impress.

As for customisation, the built-in accessory tabs allow for helpful auxiliary lighting to brighten the way ahead, and number plate repositioning mounts ensure all compatibility bases are covered.

# LOADED WITH FEATURES.

## DELUXE.

Easily bolts directly to your vehicles' chassis, the Deluxe Series provides additional protection, while allowing for number plate repositioning and additional auxiliary lighting.
