TJM. Since 1973 it's stood for Taylor, Jones and Mollenhauer, but beyond those initials TJM means so much more. TJM means quality. TJM means innovation. TJM means pushing the boundaries and striding into the unknown with confidence. TJM means Take The Lead.

TJM 4x4 Equipped was founded almost half a century ago by three friends with an unshakable desire to explore the outdoors. While much has changed in the

years since then, one thing hasn't: our belief in our mission to equip 4x4 owners and off-road explorers with the gear they need to take them further than ever before.

So, whether you're headed to a lonely red dune in the middle of the desert, a lush green forests along a thin dirt track or a sun-drenched campsite nestled by the beach, TJM is here to empower your adventurous side and make your 4x4 ready for anything.

## TJM DESIGN PHILOSOPHY.

Every TJM product is crafted with functionality, form and quality at its core. Designed and engineered in Australia, our range is always expanding and improving thanks to our in-house team of passionate experts who deeply understand what overlanders want and need. This experience and insight are what allows us to produce industry-leading equipment that's tougher than the places they're made for.

## TESTED AROUND THE WORLD FOR EVERY CONDITION.

To make sure our products are ready to perform at the highest level in the toughest conditions, we rigorously test them in the world's roughest off-road destination: Australia. In combination with advanced finite element analysis (FEA) testing and stringent physical tests in our research and development workshop, our extensive real-world tests ensure that you can journey into the unknown with complete confidence.

# TOYOTA TACOMA

Backed by incredible all-terrain features and the horsepower needed to go farther and wider, the Toyota Tacoma is an incredible rock-crushing midsize truck. But when it comes to challenging overlanding adventures, where one wrong move could spell disaster, our 4x4 accessories turn your Tacoma into an all-conquering beast.

Giving your rig the protection it needs to keep the adventure going, our all-steel, high-strength Frontier Front Bumper and Rear Protection Bumper offer incredible impact strength, while light and winch provisions are there to set your Tacoma up the way you want. Approach and departure angles are also maximized for any rocky climb, and our rock sliders keep your Tacoma's sides looking their best as you easily glide over obstacles.

## FRONTIER FRONT BUMPER.

Custom designed from the ground up, the TJM Frontier Front Bumper features an all-steel construction offering incredible impact strength to give your Tacoma the superior protection it needs. Its unique, angular design casts stunning good looks while maximizing the approach angle available to negate potential body damage and makes rocky climbs a breeze. The Frontier Front Bumper also comes with a unique chassis mounted and integrated winch frame (rated to 12,000lb), along with built-in recovery tow points equipped with more than enough strength to easily recover your vehicle. Rounding off this statement maker is the incredible customization potential, with provisions for TJM's LED rock lights, 3-Inch LED fog lights and LED light bars for navigation in extremely low-light conditions. When it comes to overlanding adventures in your Tacoma, trust the Australian and American-engineered Frontier Front Bumper and Take the Lead with TJM.

## Rock lights

Whether it's runs before sun up or overlanding journeys in the dead of night, TJM's Rock Lights offer 810 lumens of crisp white light to give you enhanced visibility for picture perfect wheel placement.

## ROCK SLIDERS.

Made from heavy-duty steel, TJM's Rock Sliders are chassis mounted for optimal strength and provide comprehensive protection for your 4x4 side rocker panels and lower doors. Sporting a twin tube design, with a 60mm outer tube and a 48mm inner tube, TJM have also included strengthened recovery Hi-Lift jack mount points, on each slider, plus a built-in skid plate to easily glide over obstacles.

*TJM Rock Sliders are finished in a durable black textured powdercoat to easily handle those overlanding scrapes, no matter where your adventures take you.*

*TJM's Rear Protection Bumper is designed to utilize the maximum available departure angle, while providing excellent rear protection.*

## REAR PROTECTION BUMPER.

Backed by a high-strength, all-steel construction and unique chassis mounted design, keeping your Tacoma's rear side protected is easy thanks to TJM's Rear Protection Bumper. Designed and developed in Australia as well as right here in America to incorporate the maximum available departure angle for any overlanding adventure, the Rear Protection Bumper also comes with built-in D-Ring points for potential recovery situations and provides easy access to the bed of your Tacoma with a novel step design. Compatible with all your Tacoma's safety features, the TJM Rear Protection Bumper also allows for the fitment of LED Rock Lights to give you enhanced visibility in low-light conditions for picture perfect wheel placement. On top of the incredible impact strength the Rear Protection Bumper provides, it's finished in a matt black textured powdercoat for superior durability and eye-catching good looks.

# TOYOTA 4RUNNER

The Toyota 4Runner is a legendary machine. Built the old-fashioned way with a body-on-frame construction and a solid rear axle, if you're in the game for some seriously rugged journeys littered with tricky obstacles and challenging ascents, the 4Runner's rough & tumble trail capabilities are unmatched. And to ensure your all-terrain vehicle can tackle any overlanding adventure, we've got just the 4x4 accessories you need.

Expertly developed to pair nicely with your 4Runner's clean lines, our Airtec Snorkel ensures your SUV goes the distance by keeping dust and water out of your engine bay and ventilation at a premium – preventing your engine from overheating. Our press-designed Frontier Front Bumper offers incredible protection at the front of your vehicle, while our heavy-duty steel Rear Protection Bumper and Rock Sliders round out the protection arsenal.

As far as functionality goes, we've got that in spades. Our TJM 4Runner accessories come with countless customization options such as LED Rock Lights, TJM Torq & WARN Zeon 9500 winches, fog lights and more, including our optional Swing-Out Carrier Arms to hold spare tires, extra fuel and recovery gear.

## FRONTIER FRONT BUMPER.

When it comes to protecting your 4Runner's vitals and maximizing your approach angle, nothing comes close to the incredible TJM Frontier Front Bumper. Manufactured from a highly-innovative one-piece construction, that's been press designed for additional strength, the Frontier Front Bumper is more than capable of handling even the toughest overlanding adventures. Featuring proprietary Hi-Lift jack points as standard, it also comes with TJM's unique chassis mounted and integrated winch frame (compatible with TJM Torq and WARN Zeon 9500 winches), along with built-in recovery tow points to easily get your 4Runner unstuck. The Frontier Front Bumper also has plenty of customization provisions for LED rock lights, fog lights and a whole host of other accessories. Equip the TJM Frontier Front Bumper to your 4Runner and get instant peace of mind knowing that, on top of serious good looks, you've got the best protection for your pride and joy.

### Rock lights

Spot tricky obstacles and make traversing rocky terrain child's play by giving your Frontier Front Bumper an additional, powerful light source up front with TJM's Rock Lights.

## REAR PROTECTION BUMPER.

For protection and convenience at the back of your 4Runner, nothing quite compares to the TJM Rear Protection Bumper. Constructed from high-strength, heavy-duty steel for incredible impact protection, the TJM Rear Protection Bumper has been expertly designed and developed in Australia as well as right here on home soil to incorporate the maximum available departure angle for any overlanding adventure. The Rear Protection Bumper also allows for the fitment of an optional single or dual swing out carrier arm, allowing you to carry a spare tire or fuel tank, or even both with the dual option, without having to worry about onboard storage space. It's also chassis-mounted for maximum strength and integrates seamlessly with Toyota's factory receiver hitch. And, rounding off this impressive rear bumper, is the incredible customization potential with provisions to fit square 3" LED lights, complete with LED indicators and parking lights, for greater safety and visibility in low-light conditions. The Rear Protection Bumper is finished in a matt black textured powdercoat offering striking good looks on your 4Runner and impeccable durability.

## REAR PROTECTION BUMPER SWING ARMS.

If bringing recovery gear, spare tires or even extra fuel is a prerequisite for your overlanding journeys, then adding Swing Arms to your 4Runner's Rear Protection Bumper is a no brainer. Available as a single or dual swing out carrier arm, the left sided arm features a built-in table, mounting point for your Hi-Lift Jack or a 1, 2 or 3.5 Gallon Rotopax fuel, and offers you the ability to mount an LED camp light – with a switch location provided. The right sided arm also features a built-in table, along with a mounting position to store up to a 37" tire. Padlock provisions for additional security have also been thought of and included in the kit is a license plate holder, LED light and camera relocation bracket.

The Swing Arms are supported by gas struts for controlled opening and closing, and feature easy to reach remote latches for one-handed operation. Locking pins have also been included to keep the Swing Arms at a particular angle and, perhaps the best part, they even feature built-in bottle openers so you can enjoy a cold beer or soda pop on your hot overlanding or camping adventures.

## AIRTEC SNORKEL.

If you plan on swapping the asphalt for dusty trails and water crossing in your 4Runner, you can't be without TJM's Airtec Snorkel.

Constructed from high-grade UV resistant polyurethane, TJM's Airtec Snorkel provides hassle-free air induction by drawing in cleaner air at roof level to extend the life of your air filters, and provide welcome airflow to keep your engine bay well ventilated. It even captures and disperses any moisture from entering the airstream thanks to its highly innovative Airtec Ram, ensuring your 4Runner can go the distance.

*Designed to mold perfectly against the 4Runner's unique body shape, TJM's Airtec Snorkel seamlessly provides incredible air induction while complementing the 4Runner's stunning good looks.*

## ROCK SLIDERS.

Made from heavy-duty steel, TJM's Rock Sliders are chassis mounted for optimal strength and provide comprehensive protection for your 4x4 side rocker panels and lower doors. Sporting a twin tube design, with a 60mm outer tube and a 48mm inner tube, TJM have also included strengthened recovery Hi-Lift jack mount points, on each slider, plus a built-in skid plate to easily glide over obstacles, while a black powdercoat finish maximizes durability.

# JEEP WRANGLER

With incredible traction, power, maneuverability, torque and overall capability, whether it's rocky mountains, desert straights, perilous rapids or open plains - the Jeep Wrangler is built for the fearless. But even modern-day marvels like this beast need the best 4x4 accessories on the market to keep the adventure going, and your Wrangler performing at its best.

Suitable for your JK or JL Wrangler, our Rock Crawler 'Stubby' Front Bumper gives your Jeep the protection and convenience it needs to thrive – not just survive. With built-in recovery points, separate winch frame, and forward & side-facing LED Rock Lights, this clean, high-clearance bumper is exactly what you need to experience all America has to offer.

And, for incredible impact protection at the rear, our Rear Protection Carrier Bumper molds perfectly against your Wrangler's clean lines, maximizing the departure angle available to make rocky descents a breeze. Plus, you can attach an optional swing-out carrier arm to store a spare tire, Hi-Lift Jack and Rotopax mount.

Throw in some heavy-duty, chassis-mounted steel rock sliders and LED rock lights at the back, and you're ready to Take the Lead.

## ROCK CRAWLER 'STUBBY' FRONT BUMPER.

TJM's Rock Crawler 'Stubby' Bumper, for your JK and JL Wrangler, integrates a top loop or push bar, and a bunch of other features, into a clean, bolt-on, heavy-duty and high-clearance package. Designed and engineered right here in America, the 'Stubby' Bumper comes with a separate winch frame mount that's bolted through the rock solid 3/16 steel front bumper, allowing you to easily get your Wrangler unstuck in a hurry. It also comes with class-leading tow points, designed for both shackle and direct strap retrieval, and has been thoroughly tested to withstand the toughest overlanding conditions in America. And for those unexpected, or planned, night runs, the TJM Rock Crawler 'Stubby' Bumper comes armed with forward and side-facing LED Rock Lights, giving you incredible visibility for perfect wheel placement. With the Rock Crawler 'Stubby' Bumper fixed to the front of your Wrangler, it's time to Take the Lead and experience the best overlanding adventures America has to offer.

### Rock lights

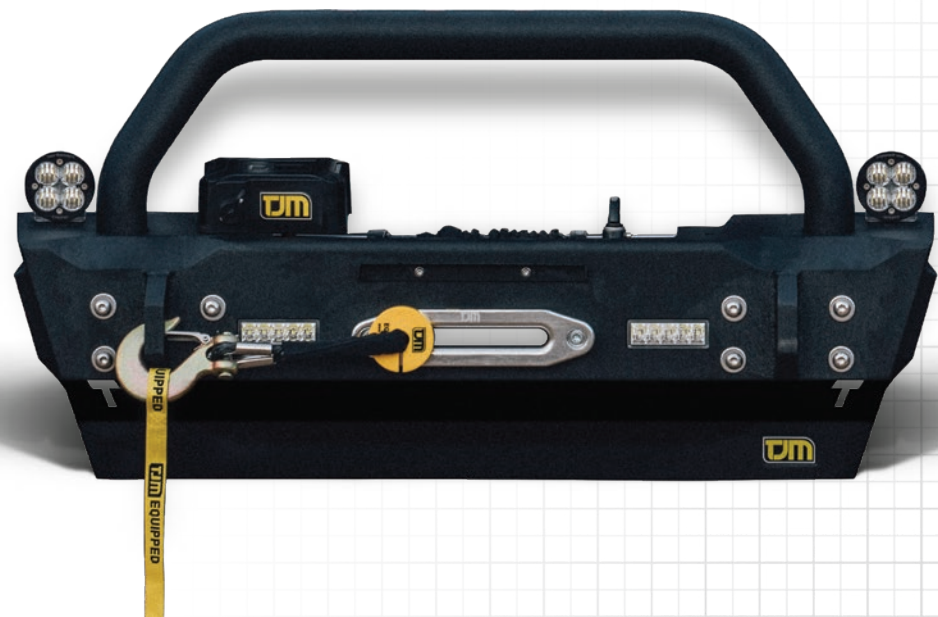

TJM's Rock Crawler 'Stubby' bumper includes TJM's Rock Lights for those night run adventures when you need to see into the dark for that ideal wheel placement.

TJM's Rock Crawler 'Stubby' Bumper features a unique chassis mounted winch frame that spreads the winch load evenly across the chassis, and makes it strong enough for up to 9500lb rated winches.

## ROCK SLIDERS.

Made from heavy-duty steel, TJM's Rock Sliders are chassis mounted for optimal strength and provide comprehensive protection for your Jeep Wrangler's side rocker panels and lower doors. Sporting a strong twin tube design, with a 60mm outer tube and a 48mm inner tube, ensuring your Wrangler is supported across the entire length of the rock slider, TJM have also included strengthened recovery Hi-Lift jack mount points, on each slider, plus a built-in skid plate to easily glide over obstacles. Finished in a durable black textured powdercoat, TJM's Rock Sliders ensure your Wrangler is 4x4 Equipped to handle any and all scrapes in your overlanding adventures.

## REAR PROTECTION BUMPER & OPTIONAL TIRE CARRIER.

Expertly designed and engineered right here in America, TJM's Rear Protection Carrier Bumper offers excellent rear protection, while an optional swing out carrier gives your 2018+ JL Jeep Wrangler an extra platform to mount a spare tire, Hi-Lift Jack and Rotopax mount. Its slimline design molds perfectly against your Wrangler's clean lines, while maximizing the departure angle available to negate potential body damage and makes rocky descents a breeze. TJM have also included Hi-Lift Jack points and HD Recovery points as standard for that ultimate overlanding set up. And for you night runners, the TJM Rear Protection Carrier Bumper comes with LED Rock Lights to give you enhanced visibility for picture perfect wheel placement. Backed by an all-steel construction and chassis mounted design for maximum impact strength, the Rear Protection Carrier Bumper is finished in an eye-catching matt black textured powdercoat for a durable, low-maintenance finish.

COMPATIBLE WITH ALL MANUFACTURER SAFETY FEATURES  
GIVING YOU ADDED PROTECTION AND FUNCTIONALITY WITHOUT  
COMPROMISING YOUR VEHICLE'S IN-BUILT FEATURES.

*Tackle any overlanding adventure and experience all America has to offer with TJM.*

### Rock lights

Backed by polycarbonate lenses and housed in IP67 water and dust-proof tough aluminum, TJM's Rock Lights are built for any overlanding journey – no matter how tough.

TJM 4X4 EQUIPPED

# SUSPENSION

## XGS RUGGED SHOCKS & STRUTS.

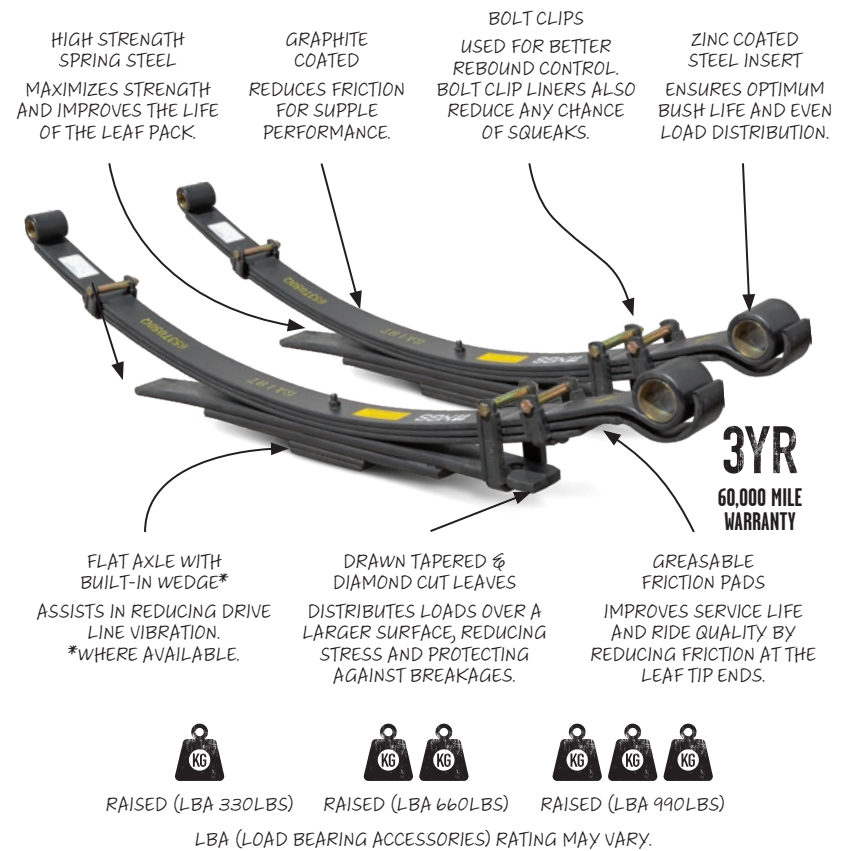

TJM XGS Suspension takes monotube shock absorbers to the next level. Built for heavy-duty use, XGS shocks are nitrogen charged and feature an impressive 0.7inØ hard-chromed piston rod, 2in big bore piston, floating piston volume control and a threaded body for infinite ride height adjustability (struts only). However, they're also able to dynamically adapt to changes in terrain and driving conditions thanks to their Multi-Stage Velocity-Controlled Valving (MSVC Valving), giving you a smoother and more intuitive ride whether you're driving around town or barreling down a corrugated track.

Travel further afield with confidence using TJM XGS Suspension. Internally, TJM XGS shock absorbers boast high-grade damping oil that, when combined with the monotube floating piston design, it intuitively prevents oil 'foaming' and declining performance during your off-road adventures. These features allow XGS shock absorbers to perform at a high level for longer, which is why all TJM XGS shock absorbers and struts are backed by a 3-year, 60,000-mile warranty.

## XGS LEAF SPRINGS.

XGS Leaf Springs provide a significant improvement to your vehicle's load-carrying ability, towing safety, ride comfort and directional stability. All XGS Leaf Springs feature greaseable friction pads for longer service life and improved ride quality, while their diamond cut reduces load stress and protects against breakage. Utilizing high-grade spring steel for superior off-road flexibility, XGS Leaf Springs offer better traction through increased wheel travel and ground clearance.

## XGS COIL SPRINGS.

Coil springs support your vehicle's weight all day, every day, which makes them a crucial component of any vehicle suspension system. XGS Coil Springs are available in a linear coil or progressive coil design. They are manufactured on computer-controlled coiling machines, scragged before and after shot peening, load-tested and then finished with a durable powder-coated finish to ensure exceptional quality and performance.

### Greaseable shackles & pins

A greased shackle pin greatly reduces friction and operating temperatures, while prolonging the life of the bush. XGS Greasable Shackles make the messy and time-consuming task of bush lubrication incredibly easy.

### Castor correction & bushes

Low castor and inadequate bushes create undesirable driving characteristics such as vague or unresponsive steering, understeer and straight-line instability. To permanently correct this, TJM have developed a range of premium quality castor correction kits and durable polyurethane bushes.

### Upper control arms

The TJM fully fabricated upper control arms are 100% bolt-on and designed to work with any suspension lift 2.5" and higher. TJM fabricated arms were designed to bring your factory suspension geometry back to OE specifications so you can correctly align your vehicle, while maximizing overall suspension travel.

### U-bolts

It is a must to replace U-bolts when new springs are installed. XGS U-Bolts are matched in length to the XGS Leaf Spring range to accommodate the increased stack height of the spring.

### Sway bars & link pins

A sway bar, in general terms, is a bar that's mounted laterally on a vehicle's suspension and chassis to reduce body roll. The sway bar transfers movement from one side of the suspension to the other through the connection of a bar to each side of an axle by sway bar links.

TJM 4X4 EQUIPPED

# CAMPING, STORAGE & CARGO GEAR

## YULARA ROOF TOP TENT.

Getting a good night's sleep in the great outdoors is easy with a roof top tent. Made to give you space, comfort and protection from the elements (and wildlife), a quality roof top tent delivers supreme levels of relaxation at any campsite.

TJM roof top tents have been designed for ultimate comfort and maximum durability. Made from high-quality poly-cotton ripstop fabric. All elements of the Yulara tent are double stitched for exceptional longevity and waterproofing, while they also feature large, fully screened windows and doors for welcome ventilation. Boasting a high-density foam mattress, a pull-out veranda and optional zip-on annexes, the TJM Yulara Roof Top Tent will guarantee comfort at any campsite.

- Includes sheltered canopy over tent entry
- 126 x 55.1 x 55.1in open size (47.2 x 55.1 x 11in closed)
- 100% waterproof ripstop poly-cotton canvas fly and inner
- Strong and lightweight
- Aluminum poles, base and ladder
- Comfortable 94.5 x 47.2 x 2.6in mattress

## BOULIA ROOF TOP TENT.

TJM roof top tents and awnings are ready within minutes, so you can relax and enjoy the great outdoors. There's plenty to love about highset camping where the views are better and less sand gets transported into your tent. Not to mention extra security, and with our abundant wildlife this can make for a more restful night's sleep. Manufactured from long-lasting poly/cotton breathable fabric, the Boulia roof top tent is mold resistant, waterproof and fits neatly onto the roof of your 4x4. Access is easy, with the included aluminum retractable ladder. No need to worry about inflating air mattresses either, as a 2.6in high-density foam mattress with a removable cover is also included. The Boulia features fully screened windows and doors, and a pull-out veranda. To get even more space add an optional TJM zip-on annex.

*TJM roof top tents have been designed for ultimate comfort and maximum durability and make the perfect partner on your overlanding journeys.*

- Includes sheltered canopy over tent entry
- 94.5 x 55.1 x 55.1cm open size (47.2 x 55.1 x 11in closed)
- 100% waterproof ripstop poly-cotton canvas fly and inner
- Strong and lightweight aluminum poles, base and ladder
- Comfortable 94.5 x 47.2 x 2.6in mattress

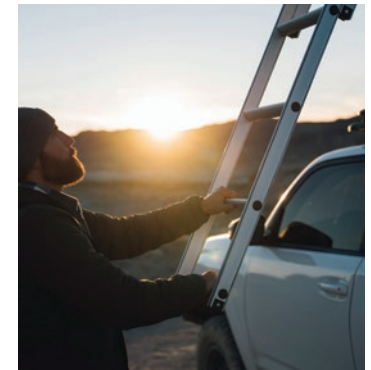

## YULARA ANNEXE.

TJM Yulara roof top tent annex with floor 86.6 x 55.1 x 78.7in. The optional annex provides additional privacy, space and comfort with enough room to fit two stretcher beds without obstructing access to the rooftop sleeping area. Windows and doors on all sides provides maximum ventilation.

## BOULIA ANNEXE.

TJM Boulia roof top tent annex with no floor 55.1 x 47.2 x 70.8in. 200D Oxford material with polyurethane coating. Windows and doors on all sides provide maximum ventilation.

## LADDER EXTENSION.

A ladder extension for a taller vehicle where you may need to extend the ladder leading up to your Roof Top Tent.

## AWNINGS.

A TJM awning gives you instant comfort and protection from the elements wherever you pull up. Swift to set up in under 30 seconds and simple to pack away, TJM awnings are available in three sizes to perfectly suit your travel style: 4.6 x 6.5ft (W x L), 6.5 x 8.2ft (W x L) and 8.2 x 8.2ft (W x L). The two larger variants include a seamlessly integrated LED strip light to evenly illuminate any campsite, giving you a complete day-and-night awning solution for any adventure.

The 2.0m and 2.5m awning variants come with an integrated LED strip light.

## Seriously durable

TJM Awnings are made from hardy 280gsm ripstop poly-cotton canvas that's built to last. Each awning's legs are constructed from black powder-coated aluminium to keep them standing in all conditions, while they fold away neatly in individual pole channels to make set up and pack up simple.

## Form and function

You can transform your awning into a complete camping solution with the help of some simple awning accessories. TJM awnings can be used in conjunction with TJM awning walls to give you added privacy and protection, while our awning organiser allows you to quickly access your gear and add a touch of home to any campsite.

## TJM awning front wall

The TJM Awning Front Wall attaches to the awning along a track to effectively protect you from the elements. Made from hardy 280gsm ripstop poly-cotton canvas that's built to last, the TJM Awning Front Wall delivers unbeatable sun protection thanks to a UV rating of UPF50+, while it also serves as a windbreak and gives you additional privacy wherever you pull up. To help with drainage when it rains, the wall also features a handy water column.

## TJM awning side walls

TJM Awning Side Wall effectively protects you from the elements. Made from hardy 280gsm ripstop poly/cotton canvas that's built to last, the TJM Awning Side Wall delivers unbeatable sun protection thanks to a UV rating of UPF50+, while it also serves as a windbreak and gives you additional privacy wherever you pull up. To help with drainage when it rains, the wall also features a handy water column.

## AWNING ORGANIZER.

Add extra storage space and make accessing the essentials easy with a TJM Awning Organizer. Made from tough 280gsm ripstop poly/cotton canvas, the TJM Awning Organizer features three canvas pockets and three mesh pockets that are perfect for stowing items that you need within arm's reach. The organiser securely slides into the TJM Awning track and can easily be folded away for when you need to hit the road.

### Organizer easily slides into the TJM Awning track

## CAMP CHAIRS.

Camping chairs are an essential part of any good campsite, but they can also be used for a day at the beach, a picnic in the park and so much more. To give TJM customers the perfect camp chair for their needs, we've got a range of camp chairs to suit every situation and every traveler.

### Premium Director's chair

Boasting a lightweight and durable aluminum frame that's combined with DuraDore® 3D mesh and nylon mesh, the TJM Premium Director's Chair is a compact and comfortable seating option for relaxing in the great outdoors. It comes with removable armrests for added comfort, PVC carry handles for transportation and a high weight capacity of 265lb.

### Director's chair

The TJM Director's Chair comes with a clever side table and in-built cup holder for added convenience, while its removable armrest covers add an extra touch of comfort. Simple to unfold and pack away, the TJM Director's chair comes with a 265lb weight capacity, as well as a carry bag that makes it easy to protect and transport.

### High Back chair

The TJM High Back chair adds an extra level of comfort to any campsite. Featuring a padded backrest to match its supportive high back, the TJM High Back Chair has a durable steel and aluminum frame that's complemented by 600D polyester with a PVC coating. A cup holder and rear and under-seat pockets give you added storage that's easy to access.

The TJM High Back chair comes with a 265lb weight capacity, as well as a carry bag.

## Camping Table

The TJM Camp Table provides the perfect outdoor dining solution to any campsite. Featuring a space-saving, foldable design for easy setup and effortless cab storage, telescopic legs that can be individually adjusted for uneven terrain, a hardy aluminium design with a load rating of 66lb and a durable polyester carry bag making transportation a breeze.

## Folding stool & table

Compact and multi-functional, the TJM Folding Stool & Table is a useful addition to any campsite, picnic or roadside stop. Boasting a tough construction that includes DuraDore® 3D mesh and nylon mesh, the tabletop has an excellent 66lb weight capacity and the stool has a 220lb weight capacity. Meanwhile, its compact size makes it easy to transport and set up in small spaces.

## SHOVELS.

Whether you're camping for the weekend, heading off-road for the day or touring long-term, a shovel is an incredibly useful bit of kit. The TJM shovel range includes three different shovel variants, meaning there's a perfect shovel for every kind of traveller.

### 59in long-handled shovel

A sturdy tool for all kinds of applications. Its 59in length gives users excellent leverage, while its rubber grip is incredibly comfortable. A bonus shovel head case is included to make storage safe and simple.

### Multi-tool shovel

Highly compact and incredibly functional, the TJM Multi-Tool Shovel is designed to help you survive and thrive in the outdoors. Its stainless steel head features a rope cutter and saw on one side and a cleaver on the other, while at the end of the handle is a glass-breaking emergency hammer. Stowed away within the shovel's handle extensions are a mountable fish knife and blade, bottle opener, flat and Phillips head screwdriver, emergency whistle and magnesium rod flint for lighting fires in a pinch. Thanks to its stainless steel head and knurled aluminium alloy handle, the TJM Multi-Tool Shovel is highly durable, while the entire shovel can be deconstructed and stored in a protective pouch.

## Foldable shovel

The TJM Folding Shovel is a simple tool that's great for digging a fire pit, cutting up small branches or cracking a coldie. The shovel head is made from tough, durable carbon steel that's finished in a smooth black powder coat. The moulded polypropylene handle is strong and comfortable to use. When its job is done, the TJM Folding Shovel packs away neatly in the included handy carry bag.

## GEAR BAGS.

Ideal for storage and made to be durable, the TJM Gear Bag range comes in a variety of capacities. The bag is made with hardy 600D PVC and features PVC rubber handles and polyester straps on either end. These bags are designed to fit inside a range of vehicle drawer systems.

## REAR WHEEL BAG.

Whether you've just set up shop or are heading back on the road, the TJM Rear Wheel Bag will keep your cab nice and clean. Made from 1200D Oxford fabric, this rear wheel bag features a 13gal main storage compartment, two 1.5gal side pockets and an easy to attach buckle system so you've got a simple and effective way to store rubbish, wet and dirty gear, recovery equipment and more.

## UTILITY CASES.

Manufactured from UV-resistant food-grade polyethylene (LLDPE) that perfectly balances strength and flexibility, each case features stainless steel hinges and rubber lid seals to prevent water, dust and dirt ingress affecting your cargo. To make transportation simple, each case features front and side tie-down slots and spring-loaded rubber handles. Available in three different sizes with a simple stackable design, the TJM Utility Case range will keep your cargo protected and secure in all conditions.

- Available in three sizes: 13gal, 23gal, 42gal
- UV-resistant food-grade LLDPE
- Recessed rubber-coated handles
- Recessed lockable steel latches with keeper
- Front and side slots to fit up to 40mm-wide straps
- In-built pressure release valve

## CAMP LIGHT KIT.

Magnetic and easy to power, the TJM 4 Bar Camp Light Kit makes a welcome addition to any campsite. Equipped with individual diffusers allowing you to choose between three different light modes, they also feature a high durable IP68 rated construction for optimal weather protection, two light switches for complete convenience and a compact zip-up carry bag for effortless storage. recovery equipment and more.

## CARGO SOLUTIONS.

Whether you're packing the car for a lazy Sunday drive, a weekend camping trip or a months-long bucket list journey, cargo is a part of every journey. To help you secure, protect and organise every bit of gear that you need for any trip, TJM has a range of anchor tracks, trusty ratchet straps and fridge tie downs that will ensure your gear remains safe and sound, no matter the adventure.

### Anchor tracks

Made from tough lightweight aluminium, the TJM Anchor Tracks provide a simple and effective way of securing cargo in the back of your vehicle. Backed by a working load limit of 750lbs, per anchor, for instant peace of mind, the anchor tracks are fully adjustable in increments of 1in, are available in 24in and 55in lengths, and come with all the mounting hardware you need.

### Ratchet straps

The TJM Ratchet Straps will quickly become your strap of choice when hauling large or heavy items. Sold in a set of two, each ratchet strap has high lashing capacity of 880lbs and a welcome 16ft of length ensuring fridges, kayaks, jet skis and other bulky cargo you're transporting remain firmly in place. It also features ergonomic rubber moulded handles and release levers, and 2 soft loops straps for situation S hooks aren't practical.

### Fridge tie downs

Picture this, you've just loaded up your onboard fridge with plenty of food, beer and tackle for when you arrive at that campsite. However, along the way there's tons of rocks, uneven terrain and treacherous climbs causing your fridge to roll around the entire cab. With TJM Fridge Tie Downs your fridge won't budge an inch! They're flawlessly easy to use thanks to their cam-locking system and each strap offers a massive 990lbs lashing capacity to guarantee long-lasting performance.

## OUTDOOR SUMMER COLLECTION.

Staying cool, calm and collected at the beach, around the campsite or during long drives to that next destination on your bucket list has never been easier with the TJM Outdoor Summer Collection.

Everything from our wide brim or bucket hats to our travel bottles, tumblers and even our TJM Umbrella, all come equipped with TJM's quality construction and design, so you know it's built tough, and eye-catching TJM branding so you'll look good no matter where you end up.

### Bucket hat

The TJM Bucket Hat is the perfect lightweight headgear option for any outdoors situation you might find yourself in. Its 100% cotton is naturally quick drying, providing optimal breathability to keep you cool.

### Travel bottle

Keep your favourite drinks at the ideal temperature with the TJM Travel Bottle. Featuring a clever one-touch temperature display, a stainless steel construction, and double-wall insulation (keep drinks warm for up to 8 hours or cold for up to 12) - the TJM Travel Bottle is built for adventure.

### Travel tumbler

Embark on any adventure with your favourite drink in hand thanks to the TJM Travel Tumbler. Featuring a spill-proof capped lid (with a built-in straw opening), and a double-walled stainless steel construction (warm for up to 8 hours or cold for up to 12) - you'll be splash-free no matter how bumpy the road gets.

### Umbrella

Don't ever be caught out by surprise rain clouds again. With it's 53in diameter double canopy, 190T Pongee fabric and a welcome anti-inversion feature (preventing your umbrella from being blown inside out), the TJM Umbrella will keep you dry no matter the weather.

**TJM 4X4 EQUIPPED**

# WINCHES & RECOVERY GEAR

There's nothing better than getting in your 4x4 and heading out to explore all this great country has to offer. However, no matter where you end up, whether it's the outback, the desert or the beach, vehicle recovery is just another part of the journey when you're traveling off-road.

To help four-wheel drivers be prepared for whatever lies ahead, we've got a complete line-up of recovery gear to choose from to get you unstuck and back exploring quick as a flash. Ranging from beach recovery gear, such as folding shovels and recovery boards, to extreme recovery situations where you'll need tried and tested recovery gear such as snatch straps, blocks, kinetic straps, hitches, shackles and even gloves to get you moving once again. With recovery gear to suit all vehicles and every recovery situation, TJM has got what you need.

## TORQ ELECTRIC WINCHES.

Venture further afield and explore the most exciting 4WD destinations with a TJM Torq Winch.

Whether you're traveling on your own or in a group, a winch is a powerful recovery tool that makes extracting vehicles simple and safe. Plus, because local tracks and far-off places both have the potential to get 4x4s stuck, a winch is useful to have on either a weekend away or on a solo Outback adventure.

TJM Torq winches are designed and tested in Australia to ensure they're ready to perform in all conditions, while their finely tuned balance of power and line speed will help you get back on track faster. They're also available in a range of sizes and cable options, to ensure there's a Torq Winch to suit every adventurer.

### Torq 9,500lb & 12,000lb

Featuring a high-performance series wound motor, that delivers fast line speeds for quick and reliable recoveries, as well as a three-stage planetary gear train, our Torq winches remain unmatched. TJM Torq winches also boast hardened drums that increase their longevity and guard against poor performance, or winch failure, at critical moments.

TJM 9,500lb and 12,000lb Torq winches come with 0.3inØ synthetic rope and an aluminum hawse fairlead - the 9,500lb with a 150:1 gear ratio - 12,000lb with a 210:1 gear ratio.

### Synthetic rope

Offering a substantially lighter option to cable, the TJM Synthetic Rope is just as strong as its steel cable counterpart with a minimum breaking strength of 17,600lb. It's also more reliable than a steel cable, without the worry of splintering or kinking, is considerably safer and incredibly durable as it comes fitted with stainless thimble and protective sleeves, at both rope ends, to reduce direct heat and minimize abrasions. The TJM Synthetic Rope comes in a massive 90ft long rope and comes standard with all TJM winches. It's also compatible with other winch brands if you'd like to swap out a worn or inferior synthetic rope with TJM quality.

### Hawse fairlead

If you are using synthetic winch rope, the TJM alloy hawse fairlead is a must. The TJM alloy hawse fairlead allows smooth rope operation while protecting synthetic ropes against damage. The lightweight aluminum construction means it weighs a lot less than a steel roller style fairlead and gives the front of your 4x4 a great look.

Traditional roller style fairleads are not suitable for synthetic ropes.

# KINETIC ROPES.

If you're trekking off-road, chances are sooner or later you're going to get bogged – particularly if you're driving on soft terrain. With a TJM Kinetic Rope you can get yourself easily unstuck in situations where a snatch strap isn't viable.

Made from 100% nylon, the TJM Kinetic Rope is available with an 18,700lb or 28,600lb breaking strength and can purchased individually or as part of a kit that includes 46,000lb rated shackles, strap keepers, a recovery blanket and gloves all stored in a large gear bag.

TJM KINETIC ROPES ARE MADE USING ONLY THE HIGHEST QUALITY MANUFACTURING PROCESSES AND MATERIALS, THEN INDEPENDENTLY TESTED TO ASSURE PROPER FUNCTION AND BREAKING STRENGTHS ARE MET.

## REINFORCED EYELETS

ALL TJM KINETIC ROPES FEATURE REINFORCED EYELETS ON BOTH ENDS AS THIS IS NORMALLY THE AREA THAT WOULD TAKE THE MOST ABUSE.

\*Comparison based on traditional snatch straps.

## IDENTIFIABLE COLOURS & CLEARLY LABELLED

EACH TJM RECOVERY STRAP AND KINETIC ROPE HAS ITS OWN IDENTIFIABLE COLOUR AND ON THE BACK OF EACH PROTECTIVE SLEEVE IS THE STRAP'S BREAKING STRENGTH.

## NEOPRENE PROTECTIVE SLEEVES

THESE PROTECTIVE SLEEVES PROVIDE CLEAR LABELLING AND PROTECTION FOR BOTH THE KINETIC ROPE AND THE VEHICLE DURING RECOVERY.

FLOATS ON WATER.

Off-road travel brings with it the chance to get bogged in sand, mud or snow, and a TJM Kinetic Rope is a smooth and predictable recovery tool to get you unstuck. Connected to a bogged vehicle and a pulling recovery vehicle, a TJM Kinetic Rope stores energy as it stretches by up to 30%, before that energy is used to free the stuck vehicle and keep the adventure going.

### **18,700lb kinetic rope recovery kit**

- 18,700lb kinetic rope 0.7"  $\varnothing$  x 29ft
- Strap keepers x2
- XL recovery gloves
- 46,000lb 0.3in soft shackle x2
- Recovery blanket
- TJM Medium Gear Bag

### **28,600lb kinetic rope recovery kit**

- 28,600lb kinetic rope 0.8"  $\varnothing$  x 29ft
- Strap keepers x2
- XL recovery gloves
- 46,000lb 0.3in soft shackle x2
- Recovery blanket
- TJM Large Gear Bag

# RECOVERY STRAPS.

Recovery straps in all their forms are a key tool for getting unstuck when a vehicle is unable to move. TJM straps are designed to reliably perform at peak levels and, to do so, they're manufactured to the highest standards and tested extensively - allowing you to traverse difficult terrain with confidence knowing you have a backup.

## Snatch straps

The TJM Snatch Strap is a vital part of any 4WD recovery kit. The combination of vehicle pull and the tension in the strap, creates a 'snatching' effect that can pull a stranded vehicle free from being bogged or unable to move under its own power.

Available in 17,600lb, 24,000lb & 33,000lb and 29ft lengths.

IDENTIFIABLE COLOURS & CLEARLY LABELLED  
EACH TJM RECOVERY STRAP HAS ITS OWN IDENTIFIABLE COLOUR AND ON THE BACK OF EACH PROTECTIVE SLEEVE IS THE STRAP'S BREAKING STRENGTH.

NEOPRENE PROTECTIVE SLEEVES  
THESE PROTECTIVE SLEEVES PROVIDE CLEAR LABELLING AND PROTECTION FOR THE TOUGH STRAP STITCHING AND THE VEHICLE DURING RECOVERY.

REINFORCED EYELETS  
ALL TJM RECOVERY STRAPS FEATURE REINFORCED EYES ON BOTH ENDS AS THIS IS NORMALLY THE AREA THAT WOULD TAKE THE MOST ABUSE.

STRAP KEEPERS INCLUDED FOR EASY STORAGE.

## Tree trunk protectors & combination tree trunk protector + equaliser strap

A TJM Tree Trunk Protector guards the tree you're anchoring to and your gear from any unnecessary damage.

Available in 17,600lb (9ft) and 22,000lb (16ft).

## Winch extension strap

The TJM winch extension strap is designed to be used when extra length is required for winching or a suitable anchor point is out of reach. The TJM winch extension strap is more convenient to store than extra lengths of winch cable.

Available in 13,200lb (65ft).

TJM SNATCH STRAPS AND RECOVERY STRAPS ARE MADE USING ONLY THE HIGHEST QUALITY MANUFACTURING PROCESSES AND MATERIALS THEN INDEPENDENTLY TESTED TO ASSURE PROPER FUNCTION AND BREAKING STRENGTHS ARE MET.

Using a snatch strap and equalizer strap with a TJM bull bar's rated recovery points is the safest way to perform a snatch recovery. You can also use soft shackles instead of bow shackles to remove steel from the recovery equipment used.

## RECOVERY KITS.

Vehicle recovery is all part of traveling off-road, not the sign of a journey gone wrong. To be fully equipped for whatever lies ahead, 4WD travelers and their 4x4 should always be prepared to extract a vehicle in need. With a range of snatch strap kits, kinetic rope kits, and complete recovery kits, TJM has ready-made vehicle recovery tools to suit all kinds of recovery situations.

### Snatch strap kit

- 8,000kg snatch strap 60mm x 9m
- 7,100 5/8" 5/8" bow shackle x2
- XL recovery gloves
- TJM Medium Gear Bag

### Heavy-duty snatch strap kit

- 24,000lb snatch strap 3in x 29ft
- 10,400lb 3/4" bow shackle x2
- XL recovery gloves
- TJM Medium Gear Bag

### Large recovery kit

- 17,600lb snatch strap 2.3in x 29ft
- 13,000lb winch extension strap 2.3in x 65ft
- 17,600lb combination tree trunk protector & equalizer strap 3in x 9.8ft
- Strap keepers x6
- 22,000lb snatch block
- 7,100lb 5/8" bow shackle x2
- Recovery blanket
- XL recovery gloves
- TJM Large Gear Bag

### Heavy-duty recovery kit

- 24,000lbkg snatch strap 3in x 29ft
- 13,000lb winch extension strap 2.3in x 65ft
- 22,000lb tree trunk protector 3in x 16ft
- Strap keepers x6
- 22,000lb snatch block
- 10,400lb 3/4" bow shackle x2
- 7,100lb 5/8" bow shackle x2
- Recovery blanket
- XL recovery gloves
- TJM Large Gear Bag

*Using a Tree Trunk Protector, Bow Shackle and a Snatch Block from the TJM Large Recovery Kit in a double-line winch recovery.*

## 5/8" & 3/4" SHACKLES.

TJM bow shackles form a key link in joining equipment for vehicle recovery situations. Our shackles are forged from steel, galvanized, then powdercoated bright yellow for clear visibility.

## SOFT SHACKLES.

Vehicle recovery is an important and potentially hazardous part of four-wheel driving, but you can make it simple and safe with a TJM 23 US ton Soft Shackle.

## RECOVERY BLANKET.

The TJM Recovery Blanket can help tame a strap or winch cable in the event of breakage and reduce the chance of whip-like recoil. This should form an essential part of your recovery kit.

## PREMIUM GLOVES.

TJM Premium Gloves are professional grade recovery gloves. These gloves ensure safe and controlled winching, using wire or synthetic winch ropes.

## RECOVERY JACK.

TJM's recovery jack is a versatile piece of equipment that provides lifting assistance to aid vehicle recovery. This jack fits directly into our unique bull bar T-slot recovery point, which has been extensively tested and can be found on many of our steel bull bars.

## JACK BASE.

This TJM Recovery Jack Base gives your recovery jack a larger, more stable footprint for safer lifting.

## TJM SNATCH BLOCK.

The TJM 10T Snatch Block can effectively double the capacity of your recovery winch. They are also useful in recovery situations where the winch anchor point is not in a direct line of the vehicle's winching direction. The TJM snatch block is complete with greasable nipple for smooth, trouble-free operation, while it has a rated working load of 22,000lbs.

## TJM RECOVERY RING.

The TJM Recovery Ring is a lighter weight option than traditional snatch blocks, suitable for use with a TJM soft shackle & synthetic rope. The TJM Recovery Ring is precision CNC machined from T6 6060 aluminum, finished in a smooth gray anodized finish to reduce friction and wear, which can lead to premature failure of your shackle & rope. It comes supplied with a handy storage bag.

## RECOVERY HITCHES.

If you're planning on going off-road, it is essential that your vehicle have at least one rear recovery point. TJM's range of recovery hitches are the perfect solution.

Specifically designed to fit into leading manufacturer tow hitches and TJM rear step tow bars, and able to be turned for both horizontal or vertical shackle alignment (to avoid shackle binding), our hitches are built to go the distance.

Extended Alloy  
Recovery Hitch

Alloy  
Recovery Hitch

Steel  
Recovery Hitch

## TIRE REPAIR KIT.

An essential accessory for off-road travelers, the TJM Tire Repair Kit is an easy solution for fixing tire punctures while you're off the beaten track. An effective temporary solution that will help keep your adventure going.

## TRED HD.

Make a new path with TJM Tred HD Recovery Boards. TJM Tred HD Recovery Boards simplify vehicle recovery in sand, mud or snow by giving your 4x4's tyres reliable traction in otherwise traction-less situations.

A TJM soft shackle provides a simpler and safer means of vehicle recovery.

A TJM bow shackle can be used with a TJM Steel Recovery Hitch.

# LIGHTING

# TJM ULTIMA 215 & 180 MK2 DRIVING LIGHTS.

TJM Ultima LED Driving Lights are the ultimate driving light for any adventure. Available in two sizes - 180mm and 215mm - which utilise a perfectly balanced combination beam pattern. Ultima driving lights deliver outstanding light output while boasting a ruggedised construction. Each light features premium Cree® XP-G2 LEDs, which are expertly directed by an aluminium metallised reflector with precisely scalloped parabolas.

While delivering unparalleled control and performance, TJM Ultima LED Driving Lights are also exceptionally durable and versatile thanks to their pressure die cast aluminium housing, tool-free vertical adjustment and hard-coated polycarbonate lenses and lens protectors.

## Engineered to survive

- Constructed from lightweight, super strong pressure die cast aluminium for uncompromised strength and rugged durability.
- Built-in 'Active Thermal Management System' (ATMS) enables TJM Ultimas to run harder for longer.
- Fully sealed against water and dust ingress (IP66 & IP67) utilising a genuine Nitto breather vent and integrated DT connector.
- Virtually unbreakable hard-coated polycarbonate lens and see-through lens protectors for stone and debris protection.

## Unique fit & adjustment

- Tool-free vertical adjustment affords quick on-the-fly beam correction via an ergonomic aluminium adjuster knob.
- Multi-slot three-bolt mounting options ensures suitability for all bull bar and nudge bar makes and models.
- Superior mounting bracketry suspension system utilises polymer rubber to suspend the lamp, making it impervious to shock and vibration.

## TJM ULTIMA 215 MK2

*Now with upgraded performance the TJM Ultima 215 & 180 MK2 driving lights produce up to 20% more light and 30% longer beam over MK1 TJM Ultima driving lights.*

### Unparalleled performance

- Class-leading hybrid beam pattern combines volume for off-road 4WD use and long range performance for transport.
- Highly polished, super-efficient aluminium metallised reflector utilising precisely scalloped parabolas for ultimate control and performance.
- Signature in-built LED light pipe meets ECE requirements for front position light improving daytime driving visibility and safety.

## TJM SEEKER SERIES.

### 230 & 180 Driving Lights

Featuring advanced Osram LED technology, die cast aluminium housing and a strong lumen output, TJM Seeker Series driving lights have plenty to offer discerning explorers who are in search of a quality set of driving lights. Available in 180mm and large 230mm variants, each Seeker Series driving light has an IP68 water and dust-proof rated housing, an integrated LED park light strip for additional safety and stainless steel mounting bracketry and hardware for secure mounting.

### 22" Light Bar

Powerful and versatile, two rows of 20 high output Osram 3W LEDs generate 5807 effective lumens and produces 1 lux at 555m, while its combo beam pattern generates an even spread of light around you.

### 21" Light Bar

A slim yet highly effective light bar that generates 3917 effective lumens and produces 1 lux at 438m. Its combo beam pattern creates a balanced spread of light from its 15 high-output Osram 3W LEDs.

### 9" Light Bar

Small but mighty, the TJM Seeker Series 9" Single Row Light bar produces 1 lux at 297m thanks to its advanced spot beam pattern. A lightweight aluminium housing surrounds 6 high output Osram 3W LEDs.

### Pod Lamp

A compact work light that produces over 700 effective lumens thanks to its 4 high output 3W Osram LEDs. Its flood beam makes it perfect for lighting up what's in front of you with a broad and even spread of light.

### Slimline Work Lamp

This low-profile work lamp sports 6 high output Bridgelux 3W LEDs that create 1150 raw lumens in a wide and even flood beam, making it perfect for lighting up broad areas on either side of your vehicle.

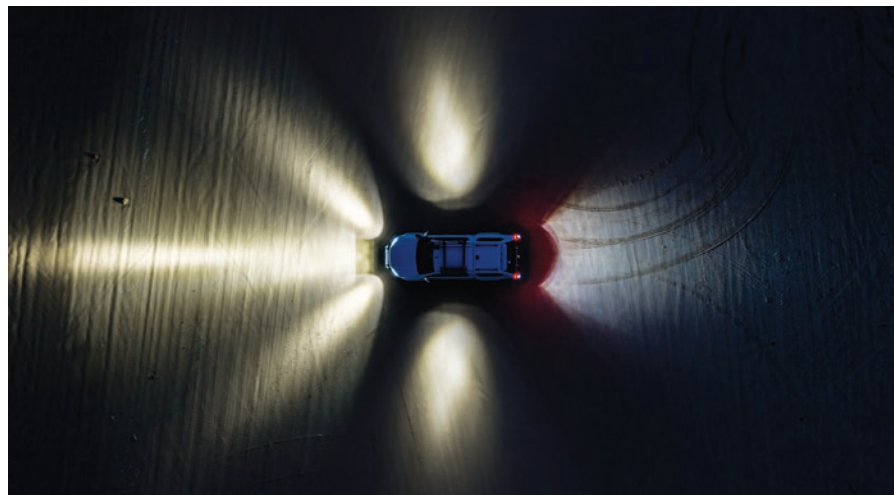

### Twin Work Lamp

Perfect for trackside and campsite illumination, the TJM Seeker Series Twin Work Lamp produces 565 effective lumens thanks to a pair of 5W Cree® LEDs that generate a broad flood beam.

*TJM Seeker Series Rock Lights fitted to the TJM Rock Sliders.*

*Front: TJM Seeker Series 21" Light Bar and Side Shooters. Side: TJM Seeker Series Twin Work Lamps. Rear: TJM Seeker Series Pod Lamps.*

### Side Shooters

The TJM Seeker Series Side Shooter produces 2,850 raw lumens thanks to its 15 carefully arranged 2W Osram LEDs. Available in pairs, its spot beam configuration generates powerful light penetration that makes it perfect for camping, off-road and on the job use.

### Rock Light

Discreet and versatile rock lights that produce crisp, white light thanks to their innovative Cree® LED technology. Featuring three 3W LEDs that produce 810 raw lumens in a wide, functional flood beam, the TJM Seeker Series Rock Lights come with flat and curved mounting pads.

### Wiring Harness

This plug and play wiring harness makes installing TJM lights easy. Included are HB3 and H4 adaptors for high beam circuitry, DT weatherproof connectors, a waterproof fuse holder with 30A fuse and an illuminated rocker switch.

### Tube mounts

These tube mounts, which are made from extruded aluminium and finish in durable black powder coat, allow for easy installation of TJM driving lamps, light bars and auxiliary lights to nudge bars and bull bars.

TJM 4X4 EQUIPPED

# PRO LOCKER

## PRO LOCKER.

The ability to lock a differential gives you instant traction in places or conditions you would otherwise have none, giving your 4x4 far more off-road potential.

The TJM Pro Locker is a highly advanced differential lock. With the flick of a switch, a TJM Pro Locker sends compressed air to engage a lock ring that links the carrier and the side gears, resulting in equal drive to both axles. Every TJM Pro Locker is designed and manufactured to ensure peak performance when you need it most, empowering you to go further and take on four-wheel drive challenges with confidence.

Constructed from high-grade SG iron with larger pinion gears and longer crown wheel bolts, the TJM Pro Locker is the pinnacle of strength. This strength translates to ultra-reliable performance and durability on the track, allowing you to consistently conquer off-road obstacles with ease.

## Built to last

The separate pneumatic system that has no internal 'o' rings or oil seals adds to its operational simplicity and low maintenance, whether you're a hard-core competitor or a weekend wheeler, we are so confident in our lockers that we can offer something no other company can,

# AIR COMPRESSORS & TIRE ACCESSORIES

Often essential and always useful, air compressors are one of the most used tools in an off-roader's arsenal. Lowering and raising tire pressures are common techniques that make tackling diverse off-road terrains easier and safer. For this reason alone, air compressors are a must-have accessory, however they can also serve a number of other purposes – making them a highly functional bit of kit.

TJM air compressors, which come in a variety of sizes and forms, are designed and tested in Australia to perform at the highest level for extended periods of time. Plus, our tire accessory range is designed to perfectly complement your choice of air compressor, giving you everything you need to roam far and wide on four wheels.

## PRO SERIES SINGLE & TWIN.

The TJM Pro Series compressors have been designed with a high emphasis on integrated functionality, higher flow rates and increased durability, making them perfect for harsh vehicle-mounted applications.

### Incredible performance every time

The second you encounter soft terrain, having a reliable and effective compressor to pressurise your tires at a moment's notice is one of the most powerful tools you can have. Our TJM Pro Series Air Compressors provide you with just that. Available in both a Single and Twin air compressor design, boasting 3cfpm and 6cfpm flow rate respectively, the Pro Series compressor range is built for lightning fast inflation thanks to impeccable internal componentry and a stellar design. Built for peak performance, the clever mounting applications, multiple inflation and auxiliary points provide exceptional utility.

WHILE THE TWIN COMPRESSOR CAN BE  
MOUNTED VERTICALLY OR HORIZONTALLY.

## PRO SERIES AIR TANK.

You've asked for it and here it is. The final piece of the puzzle for our entire Pro Series compressor range, the TJM 1.32gal (5L) and 0.66ga (2.5L) Air Tanks. When partnered with a TJM Pro Series Twin Air Compressor, the TJM Pro Series Air Tanks deliver a consistent high-volume air output of a rated maximum working pressure of 1030kPa (150psi). With this huge working pressure offering, typical applications such as tire inflation can be expanded to operating air powered tools, activating air actuated differential lockers and so much more.

### Construction

The TJM Pro Series Air Tanks sport a sleek, minimalist design that easily mounts to your utility or 4x4 vehicle without taking up vital compartment space. It's also constructed with extruded aluminum and sports a welcome anodized finish that's been custom engineered to withstand tough Australian conditions.

FULLY ADJUSTABLE FEET

TANK FEET CAN BE MOVED ANYWHERE ALONG THE EXTRUSION PROVIDING FLEXIBILITY IN VEHICLE-MOUNTED APPLICATIONS.

INCREASED STRENGTH & LONGEVITY  
ANODISED ALUMINIUM EXTRUDED BODY AND DIECAST ALLOY END CAPS OFFER EXCEPTIONAL DURABILITY AND HIGH-END FINISH.

COMPACT DESIGN  
DESIGNED TO FIT UNDERNEATH DRAWER SYSTEM WINGS.

MULTI-FIT DESIGN  
CLEVER DESIGN ALLOWS THE TANK TO BE MOUNTED AT ALMOST ANY DIRECTION AND ANGLE.

BUILT TO THRIVE  
DESIGNED TO SUIT HARSH OUTBACK CONDITIONS.

MULTIPLE PORT CONNECTIONS  
6 X 1/8 BSP PORT AND 6 X 1/4 BSPT CONNECTIONS - CAN HAVE INLETS, OUTLETS, DIFF LOCKER ACTUATORS AND MORE.

Left: TJM Tire Deflator makes quick work of lowering your tire's pressure. Right: TJM Tire Inflation Kit makes getting the right tire pressure easy.

## AIRLINE KIT.

Designed to be the perfect partner to a TJM air compressor, the TJM Airline Kit contains everything you need to cover all your inflation needs. Inside the handy carry bag is a 19.5ft heat-resistant air hose with one-touch fittings, as well as an air blower attachment and a complete set of blower nozzle attachments that suit all kinds of purposes.

## TIRE DEFLATOR.

Dropping tire pressures is an easy way to gain traction off-road and make your journey simpler. The TJM Digital Tire Deflator allows you to quickly and accurately adjust your tire pressures with a digital display read-out and multiple unit of measurement options. Protected by an easy-to-grip rubber cover and crowned by a brass screw-on chuck, the TJM Digital Tire Deflator is an essential tool for off-road adventure.

## INFLATION KIT.

Designed to make tire inflation quicker and simpler, the TJM Tire Inflation Kit features a digital gauge, a long 23.5in rubber hose and durable fittings. Getting the right tire pressure is easy thanks to a backlit digital display with multiple unit of measurement options, while a broad inflator button and in-built bleed deflator make using the TJM Tire Inflation Kit simple.

## PORTABLE COMPRESSOR.

Designed and engineered for tough Australian conditions, the TJM Portable Air Compressor makes tire pressure adjustment easy. It comes complete with a 23.5ft quick connect rubber hose, gauge and soft carry bag for damage-free packing and backed by a 5-year warranty. Add an optional TJM Tire Repair Kit for hassle-free puncture repairs on the road.

## POWER SOLUTIONS

Want to travel further with more confidence and comfort? Ask us about finding the right power management system for your needs. Our staff can help you choose the system that's right for you and then expertly install it from start to finish, giving you the power to keep your drinks cold, keep the lights on and keep the journey going.

### TJM JUMPSTARTER.

If you're traveling alone and your battery goes dead, the TJM Jump Starter & Power Bank will get you back on the road in seconds. Suitable for almost every petrol & diesel vehicle, this essential piece of kit can jump start multiple vehicles before having to be recharged, which only takes 1.5 hours using the cigarette lighter, can charge your portable devices and even power 12V air compressors using the included adapter.

### DC/SOLAR BATTERY CHARGER.

The TJM DC/Solar Battery Charger allows you to charge your 12V auxiliary battery on the go. Able to simultaneously charge from both solar and 9-32V alternator inputs – meaning it can function as an MPPT solar controller – it's also shock, vibration and dust proof (and water resistant), which makes it perfect for either in-vehicle or under-bonnet installation. Class-leading features include safe operation at high temperatures, intuitive 3-stage charging and full compatibility with GEL, AGM, WET and calcium batteries.

### BATTERY TRAYS.

TJM Battery Trays are carefully engineered to ensure you get the right sized battery mounted in the right place. Constructed from 2mm thick steel sheet, all TJM Battery Trays incorporate strategic folds and welds which make them incredibly strong, while they're also corrosion resistant for up to 500 hours.

# JOIN THE CLUB

Club TJM is made for 4x4 owners and adventurers of all kinds who want exclusive members-only benefits from TJM. From saving on your next purchase to reading stories from the road less traveled, Club TJM has something for everyone.

## SNEAK PEEKS

From new vehicle accessories to camping gear, we're always releasing new products – and Club TJM members get to hear about them first.

## SPECIAL OFFERS

Get notified when we launch special product offers and new promotions that will help you get 4x4 equipped with TJM.

## EXCLUSIVE COMPETITIONS

Club TJM members get exclusive entry to mouth-watering competitions that will gear you up and fuel your inner explorer.

## VIP EXCLUSIVE CONTENT

Find out where to go and how to get there with exclusive content that's full of information and inspiration.
